

# RETAIN

STUDENTS FOR COGNITIVE AUTONOMY

## WHO WE ARE

We are a student-led initiative dedicated to a future where AI works for humanity, not the other way around. We raise awareness on the cognitive effects of unrestricted AI use, teaching students key concepts and responsible AI habits.

As college students, we understand the changing landscape of AI, as well as its potential. RETAIN promotes student cognitive autonomy, empowering the next generation to build skills technology cannot replace.

### OUR MISSION

*Teaching students how to think with AI, not through it.*

84% of high school students use AI. It is more important now than ever for students to understand AI's impact on their thinking abilities and career prospects.

We are built on three key pillars:

**Building Cognitive Awareness**

**Empowering Strategic Decision-Making**

**Cultivating Intellectual Resilience**

### WHAT WE DO

#### Free Virtual & In-Person Visits

*Topics: AI literacy, cognition, learning habits, opportunities*

##### One-time Seminar

- 60 – 90 minutes talk led by student leader
- Guided activities, slides, and resources provided

##### Multi-week Program

- 2 – 6 week program with sustainable change
- Comprehensive overview of curriculum modules

##### Student Leadership & Advocacy

- Student leadership training
- Research and career opportunities in AI safety & policy
- Resources to form chapters and begin group/independent projects

**Join a community of leaders that raise their voice and change the world!**
